BOOK

REFERENCE BOOK

“Passion, technique and attention to detail: in a word, 3F Filippi. Every day there we are committed to doing our own better, sharing in a way transversal experiences e making them available to customers all over the world. There are in our appliances almost 70 years of experience and a pinch of the future. “

In all those projects that see our light as protagonist we aim at the full satisfaction of lighting designers, engineers, architects and, of course, the end customer: a goal that is it only achieves by listening to their needs and keeping a constant dialogue.

Inside the new reference book you will find some examples how our lighting enhances the quality of work (e therefore of life) within very different environments, from retail spaces to small commercial areas, up to factories production and offices 3.0.

Different contexts and increasingly stimulating challenges, all faced with love for our work and the certainty of guaranteeing the best high efficiency technical solutions that the market can offer.

THE COMPANY EXPERTISE 3F FILIPPI

Almost 70 years of history, 300 specialized collaborators - engaged in the company that trained them professionally -, over 60,000 square meters of production plants with state-of-the-art equipment, high technological contents, a path of constant research in fully dedicated test laboratories: among these, the Goniophotometer, a sophisticated instrumentation, which the company is one of the very few in Europe to possess, indispensable for

making photometric, spectrometric and thermal measurements, so as to be able to certify products according to the 13032 standard (the most advanced in terms of photometric calculations). 3F Filippi therefore represents a reality of international excellence in the lighting field, able to work on different scales with achievements in more than 50 countries and relations with the largest industrial groups, prestigious public bodies and institutional partners. Commercial spaces,

infrastructures, production plants, cultural assets, health buildings or buildings for training are illuminated with systems entirely designed and produced within the company: a "100% made in 3F Filippi" pursued to guarantee the absolute quality of the proposal, through a process of attention to the smallest details, which begins with the choice of raw materials to achieve the optimization of products in terms of energy saving.
