# 3F Mirella

---

Essential yet at the same time refined 3F Mirella is composed of an aluminium body that houses the LED technology and a shaped methacrylate part that accompanies the luminous flux.

The integration of the two elements makes the visual perception of the light source change inside the space during the day.

Available in various models and finishes the new system is designed to integrate discreetly in professional or residential contexts.

## LIGHT stimulus.

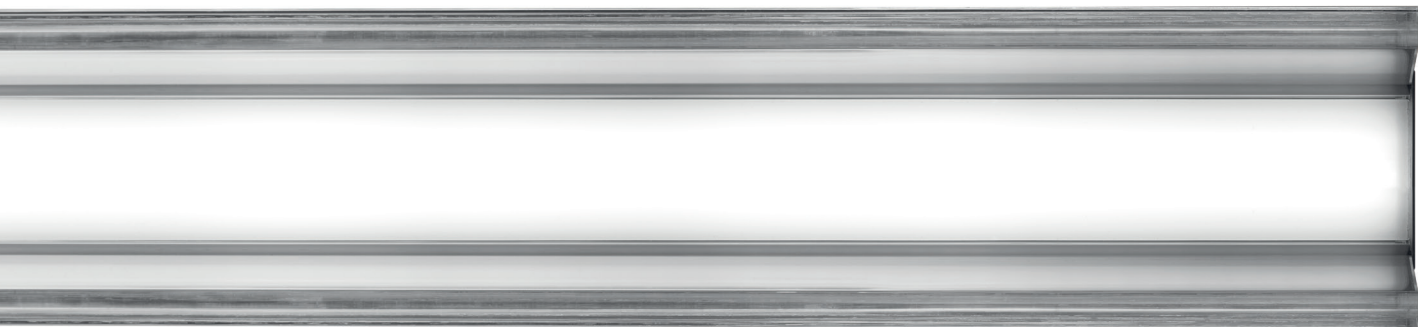

The new office contributes to the motivation of employees and, consequently, the quality of work and results.

This is without forgetting that modern workspace design is always characterised by the rationalisation of consumption, such as energy consumption, which makes it possible to increase a company's competitiveness.

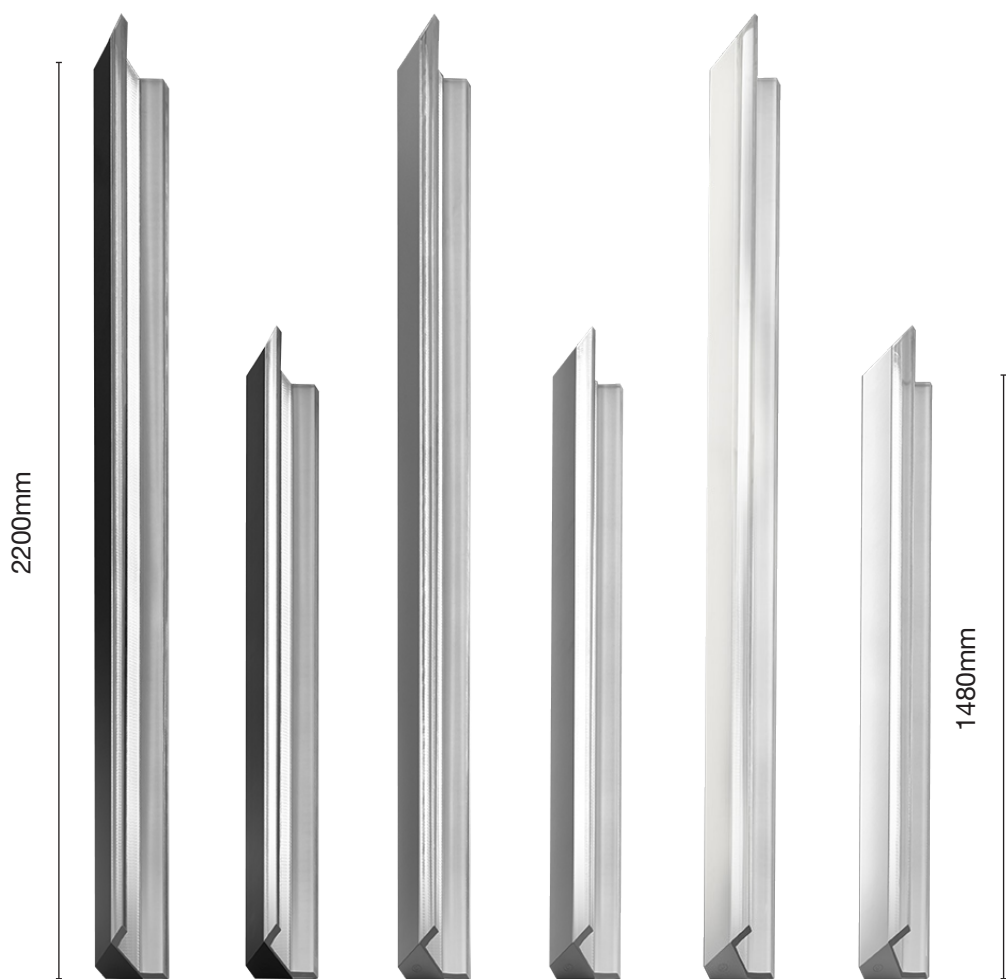

Today the office environment is increasingly a mix of open space, closed spaces and meeting areas, with an increasingly blurred boundary between work and home activities.

## Quality of **DETAILS.**

---

### the SP screen

This special screen applied to 3F Mirella is designed and studied especially for working areas.

Precisely for this reason it is used where greater visual comfort on the worktops is required.

### The OP screen

The opal screen is suitable for non-visually demanding areas.

This is why it is used in areas such as waiting rooms and passageways.

## The light of the **SENSES.**

---

Elaborate, essential and flexible, 3F Mirella is a solution suitable for the multiple configurations of contemporary architectural spaces.

It can be equipped with diffusers of different types and colors, all interchangeable, thus offering the customer the possibility to select the best quality of light and the desired visual comfort.

## Maximum **LIGHT COMFORT.**

3F Mirella is available in various finishes and colors, which have been designed taking inspiration from the simple and essential line of the body and to ensure that the methacrylate volume and the luminous flux can stand out with the product on.

Once 3F Mirella has been switched off, the lens tends to “dematerialize” putting the aluminum body in the foreground.

## QUALITY in space.

The elegance and morphology of 3F Mirella make it the product suitable for environments with VDTs, executive and representative offices and for environments with severe visual tasks, where diffused and soft lighting is required for excellent visual comfort. environment and total shielding of the source.

The OP version, on the other hand, is ideal for environments where diffused and soft lighting is required for excellent visual comfort of the environment and total shielding of the source.

## A bright **SHOW.**

---

3F Mirella aims to fully respond to the need to create a condition of harmony between man and the environment.

Light becomes the maximum bearer of this purpose precisely because good lighting is able to bind, unite the whole environment in an

unconscious, albeit visible, way.

3F Mirella stands out, but at the same time blends with the surrounding environment, resulting in the protagonist, but at the same time the appearance of the “show”.

## ESSENTIAL and REFINED.

3F Mirella is also available in its Floor variant.

Elaborate, essential and flexible, 3F Mirella Floor is a solution suitable for the multiple configurations of contemporary architectural spaces - smart working in the first place - in which a high degree of flexibility of the individual workstations is required.

Its light (direct-indirect) is perfect for the environments in which electronic equipment such as tablets, personal computers and smartphones.
